

A rear view of a silver car inside a car wash tunnel. The car has a 'WashTec' license plate. The tunnel is illuminated with vibrant blue lights on the sides and a bright red light at the front, creating a dramatic atmosphere. The 'WashTec' logo is visible on the tunnel walls and the car's license plate.

“How do I make the wash process even more attractive and individual?”

With the **LightShow** for a spectacular lighting experience.

Offer your customers a true lighting sensation: **LightShow.**

Your customers have never experienced a car wash quite like this: the LED lighting highlights each step of the wash process in superb style.

This not only looks impressive, but also increases the attractiveness of your car wash and is a real customer magnet.

How it works

The LED lighting is adjusted individually via the control menu. It is possible to highlight the individual process steps spectacularly in numerous colours and various lighting patterns such as permanent light, flashing light, stroboscope, and colour transition.

Your advantages with the LED lighting

- **Spectacular washing experience:** Highlight all the wash process steps in superb style during automatic car washing in gantry car washes.
- **Transparent wash process:** The changing colours and use of special lighting effects distinguish the individual steps in the wash process from each other and make car washing a real experience.
- **Greater attractiveness:** The LED lighting impresses car wash customers and draws in customers from far and wide.
