

“How can I combine greater convenience for my customers with higher sales?”

With the Drive-In concept for gantry car washes.

Convincing: Drive-In Car Wash.

Now also for gantry car washes: remain seated during the wash

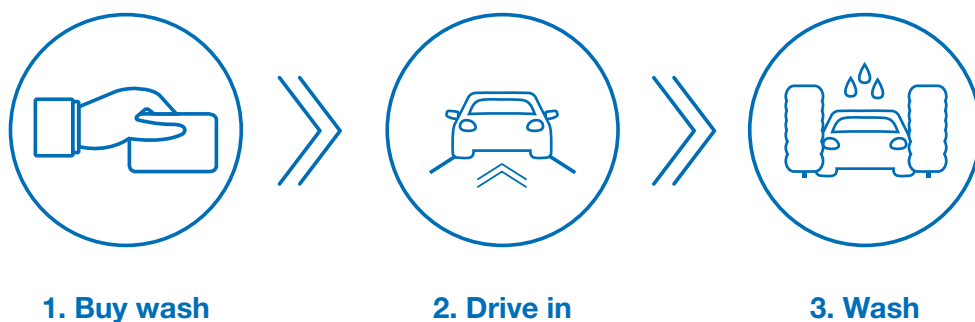

Car wash customers expect convenience. Standing about in the cold or hot sun and waiting for the car wash to complete its cycle is not „convenient“ enough. It is precisely for this reason that conveyor tunnel systems are recording further growth. You can now also offer your car wash customers convenient car washing, while you benefit from numerous advantages.

Car washing in gantry car washes – the conventional way

Buy your wash, drive in, get out, start wash, wait, get in, drive out – lots of unnecessary steps prolong a standard wash to up to at least 7 minutes. With a standard gantry car wash, this translates in the best case to around 8.5 washes per hour.

Drive-In Carwash – the way to wash today!

Buy your wash, drive in, wash, done! With the Drive-In Car Wash concept, the complete washing procedure is reduced by at least one minute. This means that up to 10 washes per hour are possible.

Higher sales. Extra convenience. Added safety.

Drive-In Car Wash – gantry car washing now much more efficient!

Capacity gain
of up to
17%

Higher sales

Car wash customers no longer have to get out and back into their vehicles. This speeds up the entire process. The waiting times between washes are significantly shorter, your customers can get started faster. Particularly at peak times, this enables you to wash more cars in a shorter time and in doing so generate more profit.

Extra convenience

Your customers can remain comfortably seated in their cars, without the hassle of having to get out, wait in the open and get back in. This allows them, for example, to relax and enjoy the cup of coffee they have just bought from you. This enables you to win conveyor tunnel system customers for your gantry wash, who primarily want convenience and comfort.

Customers can make use of the time or simply relax while the wash is in progress.

Added safety

By remaining seated in their vehicles, there are no risks of slipping or tripping for your car wash customers. Features such as width monitoring and the horn sensor additionally enhance safety.

No risks of slipping or tripping due to wet bay and rails.

The convenient way to higher sales – the new washing concept for gantry car washes.

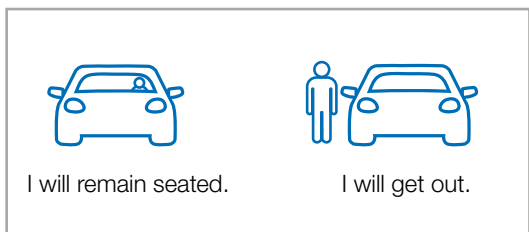

Drive-in Car Wash – The new procedure

1. Buy ticket or card at the counter.

2. Drive up to the operator terminal and activate the wash with the barcode or washing card.

3. Choose between „remain seated“ and „get out“, and follow the instructions on the touch screen.

4. Drive into the washing bay until the system displays “Stop”; the car wash starts automatically.

5. Wait for the wash to finish whilst sitting comfortably in your car and drive out straight away.

Drive-In
Car Wash can
be retrofitted.

Drive-In Car Wash – the equipment package

Operator terminal Touch 2.0 – intuitive operation

The touch screen operator terminal allows car wash customers to start the wash quickly from their cars. Batch processing also allows the next wash to be activated, whilst the current wash is still running. Animations help to guide customers optimally through the car wash process.

Flashing light – and away we go!

The flashing light indicates to car wash customers that the wash is about to start.

Width monitoring – for safety

The pressure sensitive bumper ensures that vehicles are optimally positioned and halts the car wash if, for example, a customer inadvertently opens the car door and attempts to get out of the vehicle while washing is in progress.

Horn sensor – system stop on horn sounding

A further safety feature is the sound-sensitive sensor. The car wash halts immediately on sounding the car horn. This enables customers to stop the car wash whenever they need to.

Video surveillance – a must-have for the site

If your washing bay is not yet equipped with video surveillance, we can offer you the option of a highly efficient system.
